

# Examiner's Amendment

Appl. No. 10/760,302  
Amdt. dated March 6, 2007  
Reply to Final Office Action of January 8, 2007

11. (Original) The method of claim 9, further comprising disposing of the projection medium after illumination.

12. (Original) The method of claim 9, further comprising filling a holding tank with the projection medium.

13-14. (Cancelled)

15. (Original) The method of claim <sup>9</sup>~~14~~, further comprising controlling the illumination device to illuminate the projected medium for a fixed time period.

16-33. (Cancelled)

34. (New) One or more computer-storage media having computer-executable instructions for performing a method for projecting a three dimensional object within a defined volume, the method comprising:

forcing a projection medium from a plurality of valves contained within a projector;

computing image data by calculating cross-sections for the three dimensional object and transmitting the image data to the projector to control the valves;

opening selected valves based on the image data such that a quantity of projection medium falls from the projector; and

illuminating the forced projection medium with an illumination device, wherein the projection medium forms the three-dimensional object, and the three-dimensional object is viewable circumferentially.
